

## Unprofitable Practices Followed On Farms Causes Heavy Losses Which Could Easily Be Avoided

While many unprofitable practices are followed on farms throughout the country, there are some, however, to three that are outstanding that should long ago have been corrected, observes J. B. Spender, Director of Publicity, Department of Agriculture, Ottawa. These practices are the taking of a heavy fallow crop; the rotting down of farmyard manure; and the carrying on of dairy farming with cows the production of which is not determined by modern methods.

It is many years since it became generally understood that the thick planting of corn not only wasted seed, but resulted in a crop of low feeding value. It has long been demonstrated and the information made available that fallow rates of heavy losses were about at the same rate as it losses weight. Still these two practices are permitted to cause heavy losses amongst particularly the class of farmers who can ill afford the waste that is incurred.

In the case of dairy practices, there is perhaps more excuse for them than that of feeding, housing and milking cows that give so little as not to pay their own way in the herds. Those who are still producing by simple and sure methods have long carried on this country, and thousands of herds have been built up to a profitable rate of production. Owners of hundreds of thousands of cows and thousands of cattle have the advantage of this service, and are each year helping to depress the farming industry. According to the latest issued report of the Federal Minister of Agriculture thirty-three herds, recently three thousand three hundred herds, were tested, within the past fiscal year under the Live Stock Branch cow testing policy, which operates in all the provinces except British Columbia. Sixty thousand were in Ontario. To take of the more than 1,000,000 cows, trouble was taken to weigh and test the milk of only 30,000 during sufficient of their lactation period to indicate the returns they were giving. The results were as follows. Of this number 15,180 produced 5,810 pounds of milk, containing 230,770 pounds of butterfat; 2,350 cows gave 300 pounds of butterfat, the world's largest lorry, mounted on a truck, was used to transport the 100,000 pounds of butterfat, and 26 averaged 400 pounds of butterfat.

The discovery by testing of the actual production of cows usually leads to several advanced steps in farm practice. The unprofitable practices are no longer continued in the herd, and the better cows are given greater care. More suitable and heavier yielding feeds are grown, and improvement by the use of better sires is at once commenced.

Hostile farmers in having their herds tested upwards of twenty dairy promoters are employed by the Federal Department of Agriculture in encouraging and helping in the testing and recording of basic farm cow testing associations of which there were 364 operating in the provinces of Alberta, Manitoba, Quebec and the three maritime provinces. The Live Stock Branch at Ottawa is ready to assist and to disseminate information concerning modern methods in determining whether or not the cows are producing milk in profitable quantities.

### The Other Side

As the Ottawa Journal remarks, the subject of dogs is a "tickleish one." To most of us, on occasion, dogs are a nuisance, but there is another side to it. There is the boy-and-dog side; the manuscript Little Annie's Song, intended to teach children to be kind to animals, was written for a boy to a companion to be bought for and protected. Let us not forget the boy's side of the question; to him it means a very great deal.

Moder prover: "Presents make the heart grow fonder."

We are celebrating our maid's jubilee today.

"Has not time with you 25 years?"

"No, sir, the 25th we have had this year."—Virt Ham, Stockholm.

### Big Game Hunters Travel By Airplane

#### Parties Being Organized in Europe For Trips To Africa

Expeditions are now being organized in which big game hunters, by traveling to and from Africa by air, save weeks as compared with surface transport. Nairobi, in the heart of the big-game country, is only seven days from London by the regular air mail.

Hitherto the exigencies of time, owing to the length of the journeys involved, had limited sport in Africa to the leisurely few. But the speed of the airplane has solved the problem of the modern sportsman who needs to reach, and return from, the big game lands as quickly as possible.

Sport is not the only attraction of air travel when traversing Africa. It also affords splendid views of wild life from the air. Recently, for example, during a flight from Cairo to Uganda, the King of the Belgians obtained, along the sections from Wadi Halfa, the Nile, and the surrounding vales of big game in natural surroundings. From the windows of the King's air saw he buffalo, giraffe, and herds of elephant numbering nearly 1,000 animals, and it is interesting to note that on this occasion through the pictures of the King's pilot, he could afford to the King the clearest view, they did not stampede or take flight, being apparently undisturbed by the passage of the aircraft above.

### Rudder Travels By Truck

#### "Berengarious" 35-Ton Tail Taken North For Repairs

One of the queerest travellers that has ever taken the road from South Africa to England was the 35-ton rudder of the "Berengarious." This tail of the mighty liner had to go north for repairs. It was too heavy and unwieldy for any British railway system, so "Kathleen" made the world's largest lorry, mounted on a truck, to haul the 35-ton rudder, 10 wheels and a gallant progress from the Great Hampton to the grimy iron district of the north.

Police and road scouts were warning motorists what they must expect if they should meet the mighty traveller on narrow stretches. The lorry was greeted with cheers in many a village and town, though doing a certain amount of damage to the roadside.

The start of the long journey was not long, but the road was encountered just outside the village of Wonthbridge on the Great North Road, where there was a breakdown through engine trouble, and something like 12 hours were spent in the repair of the lorry. The lorry consumed nearly 300 gallons of gasoline.

### Persistent Advertising

#### Little To Be Gained By Spasmodic Attempts At Publicity

Advertisers of little experience expect too many results too quickly, according to A. J. Dennis, advertising counsel of Toronto.

"Take take take," he said, "that is a seed, something must show above the ground the day after the seed is planted." If advertising is a stimulant, then it must stimulate the heart and limbs into action immediately and persistently.

Mr. Dennis pointed out that time is a great essential in advertising and that a campaign must be put forward persistently and patiently if results are to be expected.

"In my opinion, for two days of advertising, we must have a month in March to melt all the snows of winter," he said.

Impatience he pointed out, is the cause of many spoiled advertising campaigns, which are called off before they have had a real chance to take root.

### One For The Irish

"You know, Pat," said the Scot, "some time ago we dug the ruins of a fourteenth century castle in Scotland, and found a lot of bones. This proves that Celts and Celts and Celts were used in Scotland already in the fourteenth century."

"Well," answered Pat, "in Ireland we made a more wonderful discovery. We dug up a prehistoric dwelling and found no walls or stones. That proves that our Irish ancestors in prehistoric times used wires."

Cases are again in vogue in Eng-

### Explorers Find New Varieties Of Fish

Exploration Is Little-Known Islands Bringing Back Rare Specimens

Four-eyed fish that has one pair of eyes beneath the water and another above and fat red fish with eyes that shine in the dark were among the trophies brought back by the British Croaker Expedition from the little-known islands of Mexico and Central America.

Some 400 specimens of birds also were obtained, and mammals, plants, insects and marine life collected by the expedition which traveled 9,000 miles.

Fifty gallon jars closely packed with marine life dredged from the sea at depths from six to 200 fathoms were filled with specimens. It is believed, contain many rarities.

The four-eyed fish captured is declared to be found only in a shallow Honduras river. With double eyes, it swims just below the surface, one pair of eyes scanning the air for insects and the other set watching the bottom for food.

### Share Renting Of Farms

#### Helpful Circular Prepared At Ontario Agricultural College

An excellent circular containing a brief but comprehensive discussion of the principles and conditions of share renting of farms has just been prepared by Department of Agricultural Economics at the Ontario Agricultural College.

Anyone interested may secure a copy by writing to that department. Two main plans of rental are set forth, namely, share cropping and share renting by live-stock, machinery and labor. Many modifications of these are suggested and discussed. Tables are given showing satisfactory proportional division of expenditures and returns as between landlord and tenant, under varying conditions of farm buildings and equipment, and market facilities. The circular also contains a form of agreement which should prove very useful, both to tenants and to those who have rental agreements.

### Cost Of High Schools

#### Free Circular For Every-Body Is Enclosed

The outcry against the unprofitable cost of high school increases day by day, and the attack centers pretty much around one point.

It is the cost of the building, says a writer in Toronto Saturday Night. "Can we afford free secondary education for everybody?" As long as only a small proportion of children presented themselves for it the question was not raised. But the cost of all children appearing in high schools very much more than in cities it forces itself upon us. If all of the high school students in the city had in mind when he left school that in the old land they cannot afford it, neither can we, but we do not realize it."—Sault Daily Star.

Dorothy: "How long is my birthday?"

Mother: "Not very long, dear."

Dorothy: "Well, is it time for me to begin to be a good girl?"

Dorothy: "How long is my birthday?"

Mother: "Not very long, dear."

Dorothy: "Well, is it time for me to begin to be a good girl?"

**WHAT NEW YORK IS WEARING**  
Illustrated Dressmaking Lesson  
Furnished With Every Pattern

Here's something extremely smart in a brown plaid woolen for the little school girl of 6, 8, 10 and 12 years. It's the new coat type exactly like the grown-ups with a boy collar to match. The coat is made of a fine fabric is lined with red crepe de chine to match the leather collar.

It's a one-piece affair with an inset inverted plait at the front to give ample hem fullness. The coat is made of a fine material with 39-inch material with  $\frac{1}{2}$  yard of 3-inch contrasting and 2 yards of binding.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap coat carefully.

### The Only True Measure

What a Man Is, Not What He Has

Estimates Worth

Not what a man has, but what a man is, is the true measure of a man's worth. It is his properties rather than his possessions that count.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

What a man is, and what are his properties, is his own activities in life.

His tastes and their gratifying,

and his desire and their pursuit,

are a real evidence of a man's character.

## TROOPS QUELL SECOND RIOT AT PORTSMOUTH

Kingston, Ont.—More than 200 maddened convicts, defiant in the face of machine guns and rifle fire, rioted in open mutiny in Portsmouth penitentiary.

Seven hundred natives had threatened to break from the iron-barred cell block of Canada's largest penal institution.

One prisoner fell wounded before the fifth rifle fire of troops summoned to restore order in front of the gates. Kingston barracks by dressed prison officials. Prison authorities, who reported no further injuries, said the man was not seriously hurt.

Two days earlier, 110 convicts, since the initial outbreak came when 110 prisoners in an "overflow" dormitory overpowered their 40 guards and released another 110 convicts from cells of cells in the "big house."

Windsor, Ont.—Convict leaders, who said that most of all inmates had to be reduced one-third was one of the chief causes of the riot at Portsmouth penitentiary, according to "Red," a former convict released last month.

The former convict also said there was little doubt "rotten food" and lack of cigarette papers also contributed to the recent outbreak.

### Locomotive Blast

#### Bolier Explodes, Bringing Death To Engineer and Injuring Fireman

Dymont, Ont.—Michael Harris, engineer, is dead, and Tom O'Flaherty, fireman, and the brakeman are injured in the result of a boiler explosion in the engine of a mixed freight and freight train a mile and a half east of here.

Meager reports of the accident are reaching here over crippled communications, but a communication between eastern and western Canada was cut off at the point of the explosion between Kenora and Fort Frances. Dr. Morrison of Dryden, and Miss Watson, of the Red Cross hospital here, left hurriedly for the scene of the accident.

The train was eastbound on the Canadian Pacific Railway when the explosion occurred. Both Harris and O'Flaherty are residents of Kenora, Ontario.

### Cost Of Canadian Navy

#### Sum Expended During Last Fiscal Year Was \$304,569

Ottawa, Ont.—The total expenditure on the Royal Canadian Navy for the fiscal year ending March 31, 1932, amounted to \$304,569. Of that sum the amount expended on the acquisition of two of the new warships, "Saguenay" and "Skeena," was \$50,000. The navy is rapidly approaching the status of a Canadianized force. Of the eight commanders now serving in the R.C.N., seven are Canadian.

Up to the end of the fiscal year 22 ships ran up a bill of \$32,500.88 for fuel oil, a minimum cost in view of the fact that the destroyers, "Saguenay" and "Skeena," were not commissioned until May and June of last year.

### By-Election Is Closed

#### Liberal Candidate Noses Out By Majority Of One Vote

Summerside, P.E.I.—Given a majority of one vote in the by-election, Dr. J. E. MacNeill, Liberal, was declared elected to represent the ward of Prince in the Prince Edward Island legislative assembly.

His total vote, officially announced by the returning officer, was 1,837. H. M. Downing, his Conservative opponent, received 1,836. It is understood that Mr. Downing will file application for a recount.

### Labor Battalion Formed

#### B.C. Plans To Carry Out Road Work During Winter

Victoria, B.C.—British Columbia's first labor battalion going into being for the provision of a segregated group of men in camp for members of non-permanent active militia, was made so that these men may be placed in a single camp in the university endowment lands area. Paul Grey, Minister of labor, under whose discipline with the object of carrying out road work in that area during winter months.

## Request Passes For Workless

### Alberta Asks Help From Ottawa For Stricken Men

Edmonton, Alta.—Efforts to move single unemployed men, residents of Vancouver and other British Columbia cities, who have been stranded in Edmonton and Calgary have failed. Prime Minister Ramsay MacDonald promised to permit debate soon in the House of Commons on unemployment.

A questioning member of parliament brought the subject up again as a subject of discussion.

Mr. E. W. Browne stated no intimation had been received as to when Ottawa was prepared to do it.

It is understood that the officials have suggested each man be required to make an affidavit as to his place of residence and then the required number of railway passenger cars be sent to the men required by the federal government to take the men to their homes. Under this plan each man would receive a pass to travel on these cars.

Vancouver, B.C.—May 16. D. T. Danvers, Minister of Health, has made an effort to block Edmonton's agitation at Ottawa for the release of unemployed from the prairies on Vancouver and other coast cities, with the support of Prime Minister Bennett, urging the bill be voted.

Memorial To Premier Macdonald Urging Acceptance Of U.S. Proposals

London, England.—Three hundred well-known Britons signed a national memorandum to Prime Minister Ramsay MacDonald urging acceptance of the principle of the United States proposal to cut armaments by nearly one-third.

The memorandum said the government should "as far as possible, towards the attainment of a state of equality in armaments declare forthwith acceptance of the principle of the proposals of President Herbert Hoover."

Among the signers were Lord Cecil, the Archbishop of York, Dean Inge, Sir Oliver Gurney, Sir Norman Angell, Maud Baden, John Drury, and H. G. Wells.

### Voyage Was Uneventful

#### Miss Cira Hill Arrives In England From Churchill

Avonmouth, England.—Miss Cira Hill, Winnipeg news reporter, arrived at this transatlantic port aboard the Italian motorship "Juventus" 13 days and 21 hours after leaving Churchill, Man. She was the first woman to sail from Canada's northland.

What impressed her most was the fact the pilot was dropped only two miles out of Churchill after which the ship steamed steadily between nine and 10 knots, meeting no other ship on the day.

During the entire 3,075 miles, she said the ship had sighted only four icebergs, all early in the trip and all at a considerable distance.

### Japanese Bandits May Release Captives

#### Have Come To Agreement About British Subjects Is Report

Shanghai, China.—Japanese intermediaries at Mukden were reported to have reached an agreement to effect the release of Mrs. Kenneth Pawley and Mr. Charles Corkran, British subjects, who were captured several weeks ago by bandits.

The agreement provides for payment of 130,000 yen (about \$32,500), 250 pounds of opium and a supply of winter clothing for the bandits.

### World Economic Conference

#### Date For Meeting of London To Be Decided Soon

Ottawa, Ont.—The date for the convening of the World Economic Conference in London, England, will be decided upon at a meeting to be held on Dec. 10.

Fixing the date, which may be in December or January, will be a matter of agreement between the government of the United Kingdom, which extended the invitations, and foreign and other powers who will be represented at the conference.

### Beef Exports From Alberta

Calgary, Alberta.—More than 100,000 pounds of beef were exported from Alberta, according to S. G. Carlyle, Alberta Livestock Commissioner. There were exported also 105,000 head of cattle, of which 8,000 went overseas. He stated 1931 would go down in history as having the lowest livestock price levels in 30 years.

## The Thames Riot

### Matter To Come Up For Debate In House Of Commons

London, England.—Twelve hours after 10,000 jobless men and women had rioted in the streets of the Thames from ancient Saxon times, Prime Minister Ramsay MacDonald promised to permit debate soon in the House of Commons on unemployment.

A questioning member of parliament brought the subject up again as a subject of discussion.

Mr. E. W. Browne stated no intimation had been received as to when Ottawa was prepared to do it.

It is understood that the officials have suggested each man be required to make an affidavit as to his place of residence and then the required number of railway passenger cars be sent to the men required by the federal government to take the men to their homes. Under this plan each man would receive a pass to travel on these cars.

## SUCCEEDS CHARLESWORTH

### Jobless Create Problem

#### Providing Government Officials With Plenty Of Worry

Calgary, Alberta.—Single jobless in western Canada are in a quandary and are causing a great amount of trouble with government officials and with a knoty problem.

Efforts to have the Dominion government provide them with transportation back to their home brought stonewalls from Prime Minister Ramsay MacDonald, who stated they would all say Vancouver was their home and seek transportation for the coast city if such transportation were granted.

With 1,000 men in Edmonton in work and another 1,000 here, efforts were being made to find some means of aiding them during the winter months or paving the way for their return to their homes, when the ban on rod-riding went into effect at the end of September.

Civic officials here said no relief was being granted able-bodied men. "When a man would be granted later was not vented, pending announcement of the National Radio Broadcasting Commission.

### No Comment From Soviets

#### Press Silent So Far On Annulment Of Treaty

#### Sleeping Sickless Lasting Many Months

Chicago, Ill.—Like Washington Irving's Rip Van Winkle, the little patriotic Mr. Galt, 25, who has been ill with sleeping sickness since last February 24, is going to have a lot of news to catch up on when she awakes from her long slumber.

Physicians who have attended her in her suburban home in Oak Park say there are unmistakable signs that she is awakening and her friends are wondering what her reactions will be to the many things that have happened since she fell asleep.

## MAY CONSIDER FIVE CENT BONUS FOR 1932 CROP

### Ottawa, Ont.—The Federal Government is considering paying a bonus of five cents a bushel to western Canadian farmers of the 1932 wheat crop.

This was definitely stated by Mr. Danvers, Minister of Agriculture, when questioned on the subject by John Vallance, Liberal, (South Battisford). No indication was given when a decision could be expected.

It is the proposal of five cents a bushel was paid to western wheat growers last year by the government, and was paid through the board of grain commissioners.

The question and answer between Prime Minister Bennett and Mr. Vallance were short.

Mr. Vallance said he had received three telegrams from points in the west, urging him to press for this bonus. One telegram, he said, stated if the bonus was not granted "revolution was inevitable."

"The government is taking the matter under consideration," the Prime Minister replied.

#### WHEN FIFTY MILLION METHODISTS UNITED

The picture above shows the deed of union being signed by the three leaders at the Methodists United Conference when the 50th Methodists United Conference group in the Mother Church. The Duchess of York can be seen in the picture.

## EVIDENCE IS SUBMITTED IN BRIGHT FAN CASE

Ottawa, Ont.—Conflicting evidence was adduced at the "Bright Fan" inquiry before Mr. Justice Humphrey Melville of the Supreme Court of Nova Scotia. Captain R. E. Oliver, master of the British freighter which struck an iceberg and sank October 1 last, was 250 miles from the scene when the vessel loaded at Churchill, was the chief witness. Evidence was conflicting in regard to drinking among the officers and crew.

Captain Oliver, who was decorated for his war work in the patrol and transport services, passed through a long ordeal on the stand, weakening only when he begged to be excused from describing what he saw.

Some witnesses said there was no liquor on the ship and none in evidence at Churchill. Captain Oliver said he had done no drinking since leaving England.

Some witnesses said he had two cases of considerable port and brandy. When he left Churchill there was two bottles of brandy and two of port. When the ship went down there was one bottle of brandy and two of port.

## Discontinue Dumping Duty On Gasoline

### Gasoline Duty Has Been Holding Up Price In Various Parts Of Canada

Ottawa, Ont.—An important step was taken by the government in ordering discontinuance of the dumping duty on gasoline imported from the United States.

Mr. Danvers, without comment, apparently having been received to editorial expression.

During the Ottawa conference, Soviet newspaper threatened reprisals if Great Britain sought to place restrictions on its purchases from Russia in accord with the decision made today.

The president was making his report to the legislature on the failure of the negotiations in London which had aimed at terminating the Anglo-Soviet tariff. He said he made no time complaints had been made that these dumping duties were holding up the price of gasoline in many parts of Canada. The regular duty of two and a half cents a gallon remained.

The president said he had no time to estimate the cost of gasoline in the wholesale centres of the United States, but one estimate here was that it averaged about two cents a gallon.

Officials have decided to venture any forecast as to whether it would bring down the price of gasoline.

## Attacks Trade Treaty

### W. H. Moore Says Canada Is Forging Its Own Shackles

Ottawa, Ont.—Canada is forging its own shackles by accepting the United States tariff, which was strongly recommended to the government by William H. Moore, Liberal, South Ontario, and former chairman of the tariff advisory board.

Canada's tariff, he said, would remain right for five years irrespective of economic conditions. The secret of a successful tariff was its flexibility to meet changes in trading, yet the Dominion was "tying both its hands blindly for five years," Mr. Moore held.

## Age Of The Earth

### Toronto Scientists Place Age At Three Thousand Million Years

Toronto, Ont.—Two Toronto scientists, by means of their experiments, claim to have confirmed the age of the earth at three thousand million years.

Professor E. P. Burton, chairman of the Physics department at the University of Toronto, and Professor J. C. McLennan, claim that experiments with liquefied helium in glass vacuum bottles confirm deductions from analyses of radio-active rocks.

**Compromise With Crime**

Winnipeg, Man.—A far too tolerant attitude is being taken toward crime, and the present generation does not regard wrong-doing as a thing to be ashamed of, said Mr. Justice J. M. Macleod, in a police court here, when he reluctantly allowed three young men the freedom on suspended sentences of two years each.

### Death Of Sir Thomas

Winnipeg, Man.—Sir Thomas, a musical director in this city, and well known throughout Canada as adjudicator at musical festivals, is dead in London, England, according to word reaching here.

### Vancouver Cancels Winter Fair

Vancouver, B.C.—The annual winter fair here will not be held this year because of the expense involved, it was decided by the Vancouver Exhibition Association.

## SUCCEEDS CHARLESWORTH

### Jobless Create Problem

#### Providing Government Officials With Plenty Of Worry

#### Calgary, Alberta.—Single jobless in western Canada are in a quandary and are causing a great amount of trouble with government officials and with a knoty problem.

#### Efforts to have the Dominion government provide them with transportation back to their home brought stonewalls from Prime Minister Ramsay MacDonald, who stated they would all say Vancouver was their home and seek transportation for the coast city if such transportation were granted.

#### With 1,000 men in Edmonton in work and another 1,000 here, efforts were being made to find some means of aiding them during the winter months or paving the way for their return to their homes, when the ban on rod-riding went into effect at the end of September.

#### With 1,000 men in Edmonton in work and another 1,000 here, efforts were being made to find some means of aiding them during the winter months or paving the way for their return to their homes, when the ban on rod-riding went into effect at the end of September.

#### With 1,000 men in Edmonton in work and another 1,000 here, efforts were being made to find some means of aiding them during the winter months or paving the way for their return to their homes, when the ban on rod-riding went into effect at the end of September.

MARGARET PEDLER  
Author of "The Spendthrift", "The  
Pig", "The Girl Who Came to Town",  
"The Girl Who Came to Stay", "The  
Hoodie" and "The Moonlighters".

CHAPTER XXXV.—Continued.

"Did you know the fact that you merely wanted what was the truth. I wanted to see her because she had assured me that she could stop your marriage with Tormarin—could interfere in some way to prevent it. That was why I went to France with her. But when she told me her blackguard scheme—how she had planned and plotted to conceal the fact that Tormarin's wife was alive—and why she had done it, I would have no hand in anything. I followed her blackguard scheme—how she had planned and plotted to conceal the fact that Tormarin's wife was alive—and why she had done it, I would have no hand in anything."

— "But there are some methods at which even I draw the line."

"So—that was why you stayed away?"

"Yes, that was why. I wanted you. God only knows how I wanted you—but I couldn't try to force your hand at such a time. I couldn't profit by a damnable scheme like that."

Jean's eye's grew soft as she realized that she had been the cause of the man's temperamental demands there yet lay something fine and clean and straight—difficult to get at, perhaps, but which could yet rise to a power to sense of beauty and fairness with which she had met him and taken command of his whole nature.

"I'm glad—glad you didn't come, Geoffrey," she said gently. "Glad you—come."

"I don't know that I'm glad about it." He returned with a grim candour. "I simply couldn't do it, and that's all there is to it. But I've come now, Jean. I've come because I want you to give me just the right to look after you. I'm not asking for anything. I

only want to serve you—if you'll let me—just to serve you. If you'll let me, I'll do what I can to help you come to you again. I know I should have no right, but he's not free. Does that give me a chance, Jean? If it doesn't, I'll take my渺—If I never bother you again, I'll try Africa—big game shooting—just a short laugh." But it does—just a short laugh."

He paused and waited for her answer.

"Geoffrey, I'm so sorry—but I afraid it's all I can wish for."

"I see," he said slowly. Then for a moment his calm wavered. The underlying passion, so strongly held in leash, shook the even tones of his voice. "Tormarin is a little bit of a fool, I suppose. I'd give my soul to have everything—I'd give my soul to have what he has—your love, Jean."

He took her hands in his and held them gently with that strange, soft, reverent touch he seemed to have learned.

"I see," he said slowly. Then for a moment his calm wavered. The underlying passion, so strongly held in leash, shook the even tones of his voice. "Tormarin is a little bit of a fool, I suppose. I'd give my soul to have everything—I'd give my soul to have what he has—your love, Jean."

His big hand closed round her slight ones and he turned her to his breast. "I'm afraid yet again, I have to leave you, and Jean was left wondering sorrowfully why the love that she did not want was offered her in such full measure, hers to take at will. She had no right to leave him, she had no right to leave the love which would have meant the glory and fulfillment of life itself, was denied her—shut away but all the laws of God and Man.

CHAPTER XXXVI.

Jean leaned his against the arched court wall and looked down towards the valley below.

Spring was in the air—late to this eastern corner of the earth. The sun was bright and fragrant, the fresh growing things was permeating the atmosphere, strips of vivid blue rent the grey skies, and splashes of golden sunshine lay dappled over the shadowed village of the hill that nestled in the valley.

Dr. William,  
BABY'S OWN TABLETS

W. N. U. 1948

The months she had quitted England had sufficed to blunt the keen edge of her pain, but always she was conscious of a dull, unending ache—a constant reminder of the unpleasures and emptiness of life.

Yet she had learned to be thankful for even this much respite from the piercing agony of the first few weeks. Whatever the course of years might bring her of relief from pain, or even of some modicum of joy, those weeks when she had suffered the torments of the damned would remain stamped indelibly upon her memory.

During the last days at Charnwood she had been keyed up to a high pitch of endurance by the very magnitude of the remorse she had made. It was as though when she had strained upwards to the accomplishment of some deed that is almost beyond the power of weak human nature to achieve, there is vauchased, for that is being, the physical pain. A transport of spiritual fervour lifts the martyr beyond any ordinary recognition of the physical fire that burns and chars his flesh, and some such sense of exaltation was Jean's when she threw off the veil of abnegation by which she had surrendered her love, and with it her life's happiness, at the foot of the stern altar of Duty.

Afterwards had followed the preparations and bustle of departure, the necessary arrangements to be made and telegraphed to Birkenhead, and finally the long journey across Europe and the Atlantic and on to Canada. The required settlement before she and Claire were fully installed at Birkenhead and the wheels of the household machinery running smoothly.

But when all this was accomplished, when the long strange and painful decisions had been made and her mind was free to concern itself again with her own affairs, then Jean realized the full price of her renunciation.

And she paid it. In despair, in exhaustion, in a fit of anguish of sleepless nights that were a mental and physical torment of unbearable longing such as she had never dreamed of; in tears and in dumb, silent misery, she had to sit out, out of those racked and tortured weeks she emerged into a numb, listless capacity to pick up once more the threads of life.

Looking however, she marvelled at her own remarkable patience with which Claire had borne with her, at the selfless way in which she had devoted all her energies to ministering to one who was suffering from heartbreak—that most wearying of all emotions—those not easily comprehended by those not similarly afflicted.

Nick's "pale gold narcissus"! To Jean, who had clung to her, helped inexpressibly by the love of her friends, by the warmth and loving-kindness it seemed as though the staunch and sturdy oak were a more appropriate metaphor in which to express the soul of Claire.

She paid her now, coming with that gentle touch that strange, soft, reverent touch he seemed to have learned.

"I see," he said slowly. Then for a moment his calm wavered. The underlying passion, so strongly held in leash, shook the even tones of his voice.

"Tormarin is a little bit of a fool, I suppose. I'd give my soul to have everything—I'd give my soul to have what he has—your love, Jean."

His big hand closed round her slight ones and he turned her to his breast. "I'm afraid yet again, I have to leave you, and Jean was left wondering sorrowfully why the love that she did not want was offered her in such full measure, hers to take at will. She had no right to leave him, she had no right to leave the love which would have meant the glory and fulfillment of life itself, was denied her—shut away but all the laws of God and Man.

### Old Legend Revived

#### Human Skeleton Discovered In Gravel Pit In Ohio

In an old legend that two men lost their lives in 1840 while walking through the woods to the village of Newville, Ohio, has been revived with the finding of a human skeleton in a gravel pit near that town.

According to the story, the men started to death and their bodies, found months afterward, were buried near the spot where the bones were found.

— "We may good angels? Come to you and tell 7.25?"—leisurely—"you want me to ride down to the village and bring back two human skeletons demanded by the cook?"

Claire laughed a little. Many had implored her to begone. She had implored to begone. Jean, knowing well that once she was on the back of her favorite mare the errand which the cook demanded would probably not be easily performed. But Jean would return from a long ride over the belted hills and valleys that had been familiar to her from childhood with a faint colour in her pale cheeks and with her hair in place she had been told she had.

There was no sickness of the soul like the big, open spaces of the earth and God's clean winds and sunlight.

"No," said Claire, "it's not the lemon this time."

"What is it?" demanded Jean. "You didn't come out here just to look at the view. There's an air of importance about you."

It was true. Claire wore a little more beauty and more excitement. The colour came and went swiftly in her cheeks, and her eyes had a bright, almost dazed look, while a small anxious look kept appearing between her pretty brows. She regarded Jean under her brows.

"Well—yes, it is something," she acknowledged. "I had a letter from Lady from this morning."

### Graf Zeppelin Makes Record

#### Cost Of Ten Trips Reduced To Approximately \$10 Per Mile

In completing ten trips across the Atlantic, Graf Zeppelin has made a record that astonishes even her backers. Instead of costing almost \$50,000 a crossing, as had been expected, the expenses of the journey have been reduced to \$10,000, or an approximate \$3,000 a day. The present charge for passage is \$475, only a third more than steamer fare, while the time of transit is reduced from 12 days to three.
